Consolidation, Aggregation, Filtering & Routing of 1GbE & 10GbE Traffic for Network Monitoring

XX-32Gportable™

The **XX-32Gportable** is a smart solution, designed for consolidating of multiple 10GbE and 1GbE Span and/or 1GbE In-Line sources for Monitoring & Analysis Tools.

By its small footprint, made for maximum portability, it is operated by a desktop powersupplies and even offers redundancy by a second powersupply.

XX-32Gportable simplifies the task to monitor networks and makes such analyser tools and appliances more efficient.

It comes with the GUI-driven **XX-Manager** controlling Aggregation, Routing & Filtering the monitored Traffic on demand for such appliances.

The **XX-32Gportable** holds **four fixed(4) 1GbE & two (2) 10GbE ports**, the swappable connectivity module provides **eight (8) additional 1GbE ports** for Copper or Fiber as In-Line or Span.

Two (2) 10GbE fixed SFP+ Ports

Four (4) fixed 1GbE SFP Ports

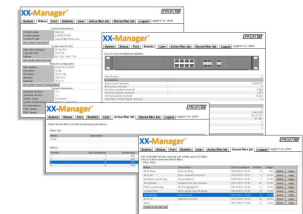

Connectivity section

„swappable“ Connectivity module :

- 8* 1GbE Copper Span's or
- 4* 1GbE Copper In-Line (or Mix In-Line/Span) or
- 8* 1GbE SFP Span's

XX-Manager™

- GUI based
- Secure Access
- User & Admin Mode

XX-series feat. Consumption/10Y:
„XX-32G saves 2.000kWh in 10Y by low power consumption“

XX-series

General Application (sample):

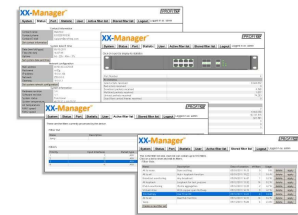

Use :

1GbE Connectivity Modul in Mix Mode (RJ45 failsafe InLine and Span) or the native SPAN Modul in RJ45 or SFP and the built-in 1GbE Span Ports & 10GbE Ports (both SFP/SFP+) as well can be used either as In- or Output.

Any kind of 10GbE or 1GbE analysis appliance is feeded with most optimized datastreams on purposes.

By the intuitive GUI-driven **XX-Manager**, XX-32Gportable is set and configured to aggregate and filter streams at all ports for in- and output traffic routed from any to many or many to any ports:

For mobile use with portable Analysis Equipment XX-32Gportable save weight and quantity of items to be carry around. A poche stores and organizes cables and powersupplies.

Order Information:

Partnumber	Description
XX-32Gportable	System XX-32Gportable Four (4) 1GbE SFP Ports/Slots * Two (2) 10GbE SFP+ Ports/Slots* (*SFP / SFP+ modules not included) incl. XX-Manager Software - Filtering, Routing, many to any and any to many, includes One Year Subscription & Software Updating
XXS-4CIL	Swappable 8 Port Copper In-Line Module 4 In-Line circuits (failsafe) RJ45 Connectors
XXS-8CSP	Swappable 8 Port Copper - SPAN Module RJ45 Connectors
XXS-2CI4S	Swappable Mix Copper Modul 2x In-Line plus 4x SPAN (RJ45 Connectors)
XXS-8SFP	Swappable 8 Port SFP (SPAN) Module (SFP modules are not included)

Specifications:

Rigid 1U metal enclosure, black oven painted
DeskTop AC international powersupply
Voltage 100-240V/50-60Hz
Low power consumption: **<40W**
Link and activity LEDs shows state on all ports
Management Ports RS232 on backside
Cooling by two (2) temperature controlled, easy serviceable fan units.

Operating : 0°C to 50°C / Storage: -20 to 90°C
Humidity : 10% to 90%, none condensing

Weight & Size:

Main unit 41x194x254 mm (HxWxD)
Weight : 1,5 kgs

Approvals:

Made in EU
